

## 13

[illegible]

The diagram illustrates a vertical pile foundation (stopy fundus) with the following specifications:

- Top Section:** A rectangular head with a width of 6 units and a height of 6 units. It contains two horizontal reinforcement bars labeled 28.
- Internal Reinforcement:** The main shaft has a diameter of  $\varnothing 20$ . It features longitudinal reinforcement bars labeled 7 and stirrups labeled 21 with a diameter of  $\varnothing 12$ .
- Dimensions and Spacing:**
  - Total length: 9x20,0=180.
  - Sectional views are indicated at heights of 20, 44, 60, and 80 from the top.
  - Reinforcement bar spacing along the shaft includes values such as 28, 25, 20, 15, 10, 5, 4, 3, 2, 1, 0.5, and 0.2.
- Labels:**
  - (28) indicates the top reinforcement bars.
  - (21) indicates the stirrup reinforcement.
  - (7) indicates the longitudinal reinforcement bars.
  - (42) and (43) indicate specific sections or levels.
  - (44) and (45) indicate other sectional views.
- Other Details:**
  - A note "otulina 50mm" points to a layer near the bottom of the shaft.
  - A label "stopy fundus" identifies the entire assembly.

[illegible]

Technical drawing of a vertical pipe with a 90-degree elbow. The drawing shows a side view with dimensions: total height 4x20.0=80, elbow radius R45, and various diameters (ø12, ø20, ø24). It also includes a cross-section view showing a 3/4 inch pipe with a 1/2 inch wall thickness. Callouts (28), (32), (39), and (40) are present.
